

Norman Goldstein MD
Editor, Hawaii Medical Journal

The Voice of the HMA

The Hawaii Medical Journal is the voice of the Hawaii Medical Association.

It is the only publication where clinical and basic research projects in Hawaii can be published to inform physicians of the many, sometimes little known medical inroads that are taking place here. It makes readers aware of the activities occurring at the Cancer Research Center, our medical school, the Hawaii Medical Library, and other medical organizations in Hawaii.

With the help of Dr. Bill Goodhue, our new Associate Editor, we are expanding dissemination of information about Native Hawaiian medical groups and activities. We will be covering more meetings, not just on Oahu, but on the neighbor islands too, and in addition to national and regional meetings, neighbor island hospital meetings will be included on these pages.

The HMA membership is now composed of 800 active and 200 retired physicians, plus 300 residents and 200 students. Thanks to the generosity of some HMA members and friends, we are mailing the May, June and July issues to non-subscribing members, so that they will appreciate what a quality, scholarly publication we have and the service to provides for our medical community. Founded in 1941, we have 60 plus years of tradition and service to uphold.

HMA members and our readers can help in this mission by subscribing to the Journal or by contributing to the Hawaii Medical Association Foundation.

The Hawaii Medical Foundation fund, HMA Community Research Bureau (501-C3) was established to support the Hawaii Medical Journal, please send your contributions to the HMA, 1360 South Beretania Street, #200, Honolulu, Hawaii 96814. Please make your check payable to the Hawaii Medical Foundation, for the Journal.

Thank you for your continued support for the Hawaii Medical Journal.
